

C.L-CNC-002X

全自动五轴车片机

功能

此机拥有五轴工作站，5个主轴，具备高光加工功能，平片、单球面、双球面、柱片，200-1000弯切割。加工速度快，光洁度好。全自动上料、放料、加工、放置泡沫盒，是目前镜片雕铣加工功能最强、精度最好的全能王

优点

- 全自动上下料
- 高难度五轴镜片加工
- 镜片树立避免刮花
- 镜片自动摆盘，防止手印
- 真正的五轴联动加工
- 高光轴切割，镜片边缘亮丽光滑
- 系统操作方便，人性化简化
- 节约人工，提升效率

Automatic cutting lens machine-5 AXIS

Functions

This machine has a five axis workstation, 5 spindles, and has high gloss processing function. It can cut flat, single spherical, double spherical, cylindrical, and cutting R200-1000. Fast speed processing and good smoothness. Fully automatic feeding, placing, processing and placing of foam box, it is the best lens cutting machine and is famous for its engraving, milling, and high precision at present.

Advantages

- Fully automatic loading and unloading.
- Suitable to complex five axis lens processing.
- Avoidance of scratches.
- And prevention of hand prints.
- Five axis and high gloss axis combined with each other to create a high gloss Finish lens edges.
- The system is easy to operate.
- User-friendly, and convenient.
- Saving labor and improving efficiency.
